

## Functionality

Pick MVP from this, if there is time, then we add features.

We have

1. users (visitors and members)
2. organizations
3. flyerz

/members/:userid/what/ever  
/admin  
/what/ever

does require the user userid to be **logged in**  
Django admin, requires the Django admin login  
does not require one to be logged in, everyone can see this

/users/:userid  
/organization/:entityid  
/members/:userid/what/ever  
/members/:userid:orgid/what/ever  
/flyerz/:entityid  
/members/:userid:orgid:flyerzid/w/e

Public userid profile  
Public organization profile  
Things only **logged in** members can do  
Things **logged in** userid can do with orgin  
Public flyer profile  
Things **logged in** userid can do with its flyer

Type of users:

Visitors  
Users  
Organizations

The non-members  
The members  
Restaurants, event organizers, sports organizers, ...
